PROFESSIONAL SUMMARY

Data Analyst and Python Automation professional with hands-on experience building ETL-style data processing workflows for banking and legal-recovery operations. Skilled in processing large multi-sheet Excel/CSV datasets, data cleaning, schema mapping, validation frameworks, and workflow automation using Python and Pandas. Experienced in transforming messy enterprise datasets into standardized upload-ready formats while significantly reducing manual effort and processing time. Strong foundation in operational analytics, reporting automation, and business data workflows.

SKILLS

Languages & Tools: Python(Pandas, OpenPyXL), SQL (Joins, Window Functions, CTEs), Power BI, Excel, Git/GitHub

ETL & Automation: Workflow Automation, ETL Pipelines, Data Cleaning, Data Validation, Schema Mapping, Reporting Automation

Analytics: EDA, Dashboard Development, KPI Reporting, Operational Analytics

EXPERIENCE

MIS Executive – Data Automation & Operations

Feb 2026 – Present

Credgenics

- Automated banking and legal-data processing workflows using Python, reducing manual processing time from 3+ hours to under 2 minutes for large multi-sheet datasets containing 700+ columns.
- Developed reusable Python automation workflows using Pandas, Requests, OpenPyXL/XlsxWriter, and file-handling modules, significantly improving operational efficiency and reducing manual Excel dependency.
- Built ETL-style workflows to process legal notice and recovery-related datasets, including datatype normalization, date standardization, pincode validation, duplicate checks, and dynamic schema handling.
- Collaborated with legal and operations teams to process, validate, and upload customer recovery and notice-generation data on internal company portals.

Data Analyst Intern

Sep 2025 – Dec 2025

iCreatives Solutions

- Performed ETL operations by extracting recruitment data from Outlook (Excel attachments, HTML tables) and job portals (Naukri.com).
- Cleaned, normalized, and transformed unstructured datasets into analysis-ready formats using Python.
- Applied text standardization using sentence embeddings, Agglomerative Clustering, and fuzzy matching techniques.
- Maintained a centralized master database to support MIS reporting and recruitment analytics.

PROJECTS

Sleeping Disorders Analytics Dashboard

Healthcare — Python — Power BI

GitHub — Portfolio

- Cleaned and analyzed healthcare data for 374 participants using Python and Pandas, performing feature engineering and data transformation to improve analytical insights.
- Built an interactive Power BI dashboard to analyze sleep disorders, BMI categories, stress levels, heart rate, and lifestyle indicators across multiple demographic segments.
- Identified high-risk health patterns and generated data-driven insights to support preventive healthcare analysis and decision-making.

Customer Churn & Campaign Analytics Dashboard

Machine Learning — Python — Power BI

GitHub — Portfolio

- Processed and analyzed customer marketing datasets containing 2,000+ records to identify churn trends, purchasing behavior, and customer segments.
- Performed feature engineering and exploratory data analysis using Python to improve churn prediction model performance and customer insight generation.
- Developed a Power BI dashboard visualizing campaign performance, customer demographics, and purchasing channels to support business and retention strategies.

EDUCATION

I.T.S Engineering College

Aug 2022 – May 2026

Bachelor of Technology in Computer Science Engineering, Greater Noida, U.P.

Imarticus Learning

Mar 2025 – Oct 2025

Data Science and Analytics Program, Connaught Place, Delhi
