PROFESSIONAL SUMMARY

I started exploring career paths during my B.Tech and discovered my passion for data analytics through guidance and real-world projects. With hands-on experience in Python, SQL, Power BI, and statistics, I enjoy turning raw data into meaningful insights. Currently expanding my knowledge in machine learning, I'm especially drawn to feature engineering and solving problems with curiosity and experimentation.

SKILLS

Technical: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL), Power BI, Tableau, Excel (Advanced, VBA), Git/GitHub, Machine Learning (Scikit-learn — PCA, Regression, Classification)

Statistical Knowledge: Normal Distribution, Central Limit Theorem, Hypothesis Testing, Statistical Tests (t-test, F-test, Chi-square, Correlation), Linear & Logistic Regression

Soft Skills: Problem Solving, Team Collaboration, Effective Communication, Adaptability

Other: Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA), Data Visualization, Report Generation

DATA ANALYST PROJECTS

SLEEPING DISORDER DASHBOARD

Healthcare | Python | Power Bi | EDA | Feature Engineering

- Analyzed sleep disorder data of 374 participants to identify patterns in BMI, heart rate, physical activity, stress levels, age, and occupation.
- Created interactive Power BI dashboards to visualize insights such as higher heart rate in obese individuals, elevated stress in sales reps, and age correlation with sleep apnea.
- Segmented data by disorder type, gender, BMI category, and occupation to reveal key health trends and lifestyle influences on sleep quality.
- Performed data cleaning and transformation to ensure accuracy and reliability of insights, improving dashboard performance and user experience.

BANK LOAN ANALYSIS AND REPORTING

Financial | Data Analyst | Business Analysis | MySQL | Power BI

- Processed and validated a dataset containing 38,000+ rows and 24 columns, ensuring data integrity for accurate analysis and reporting.
- Developed and optimized SQL queries to track key loan performance indicators (KPIs) and automated monthly reporting, improving efficiency and accuracy.
- Designed SQL-based risk assessment models to classify loans, offering critical insights into credit risk and supporting data-driven lending decisions.

VRINDA STORE SALES ANALYSIS

E-Commerce | Retail Analytics | Excel (VBA) | Data Analysis

- Analyzed over 31,000+ sales records from an online fashion store to identify patterns in customer demographics, product categories, order statuses, and channel performance. Created multiple dashboards and pivot tables across sheets like "Sales vs Order," "Men vs Women," "Order Status," and "Top 5 Products" to highlight key business metrics.
- Segmented customer data by gender, age group, and location to understand purchasing behavior and demographic influence on product preferences. Used Excel macros and formulas to automate repetitive tasks and calculations, enhancing analysis efficiency.

EDUCATION

Imarticus Learning

Postgraduate Program in Data Science and Analytics

I.T.S engineering college

B.Tech in CSE

Connaught Place, Delhi

Mar 2025 – Jan 2026

Greater Noida, U.P

Aug 2022 – May 2026
